

# Bulletin of MECHANICAL ENGINEERING EDUCATION

118  
VOLUME 3

1964

**EDITORS: J. H. LAMBLE, J. PARKER and J. L. DUNCAN**

in collaboration with

**Prof. W. JOHNSON**

*The Manchester College of Science & Technology*

*Supported by an International Board of Consulting Editors*

# Bulletin of MECHANICAL ENGINEERING EDUCATION

---

## *Joint Editors*

J. H. LAMBLE, D.Sc. and J. PARKER, Ph.D.

## *Reviews Editor*

J. L. DUNCAN, B.E. (Melbourne)

in collaboration with Professor W. JOHNSON,

The Manchester College of Science & Technology.

## *Consulting Editors*

A. N. BLACK, The University, Southampton.

B. A. BOLEY, Columbia University, New York.

A. F. BURSTALL, Durham University, Newcastle upon Tyne.

W. CARNEGIE, Battersea College, London.

A. W. J. CHISHOLM, Royal College, Salford, Lancs.

J. A. COLE, University of Western Australia, Australia.

B. CROSSLAND, Queen's University, Belfast, N.I.

J. P. DUNCAN, Sheffield University, Sheffield.

W. N. FINDLEY, Brown University, Providence, R.I.

H. HAMPSON, Rob't. Gordon Technical College, Aberdeen.

D. W. HOLDER, Oxford University, Oxford.

J. H. HORLOCK, Liverpool University, Liverpool.

J. G. JAGGER, Bradford Institute, Bradford, Yorks.

K. L. JOHNSON, Cambridge University, Cambridge.

G. D. S. MACLELLAN, Glasgow University, Glasgow.

J. B. MANTLE, University of Saskatchewan, Saskatoon, Canada.

J. MARIN, Pennsylvania State University, Pennsylvania.

D. L. MORDELL, McGill University, Montreal, Canada.

E. W. PARKES, Leicester University, Leicester.

E. PESTEL, Technische Hochschule, Hanover, Germany

G. F. C. ROGERS, Bristol University, Bristol.

M. C. SHAW, Carnegie Institute, Pittsburgh, Pa.

J. B. THIRLWELL, Northampton College, London.

A. L. TITCHENER, University of Auckland, New Zealand.

S. A. TOBIAS, Birmingham University, Birmingham.

A. H. WILLIS, University of New South Wales, Australia.

---

## *Publishing Offices*

Pergamon Press Limited, Headington Hill Hall, Oxford, England.

Pergamon Press Inc., 44-01 21st Street, Long Island City, N.Y. 11101.

## *Annual Subscription Rates*

(A) For all institutional, industrial and government establishments, and educational establishments outside the British Commonwealth, £7 (\$20) for 1965.

(B) For individuals and for educational establishments within the British Commonwealth, £2 (\$6).

## PERGAMON PRESS LIMITED

HEADINGTON HILL HALL,  
OXFORD

44-01 21st STREET,  
LONG ISLAND CITY, N.Y. 11101

# VOLUME 3

## CONTENTS LISTS

### Number 1

	PAGE
D. H. NORRIE: The towing of small ship models . . . . .	1
R. THOMSON: Experimental determination of the lift and drag of a spinning ball . . . . .	9
J. K. ROYLE: Comment: Other thoughts on the spinning ball experiment . . . . .	13
D. McCLOY: A graphical method for determining transient response . . . . .	15
T. H. DAVIES: Graphical aids to the understanding of steady-state mechanical vibrations . . . . .	25
M. J. HILLIER: Virtual work: Inertia and mechanisms analysis . . . . .	33
H. L. COX: Dynamic stresses in gun springs . . . . .	35
D. C. CHANDLER and G. M. W. GREGORY: An experimental investigation into the stress distribution in thick cylinders . . . . .	43
P. W. TURNER: Autographic demonstration instrument . . . . .	47
W. J. D. ANNAND: The first law of thermodynamics and the theory of machines . . . . .	49
T. E. FERGUSON: Compressible flow in a constant area duct . . . . .	57
Y. R. MAYHEW: Numerical method for unsteady one-dimensional conduction . . . . .	63
C. C. PERRY: The introduction and application of statistics in engineering laboratory courses. . . . .	75
S. A. V. SWANSON: A discussion of elementary dynamics . . . . .	79
Book Review . . . . .	83

### Number 2

Editorial . . . . .	85
A. W. ROBERTS, J. A. ELLIOTT and R. E. LUXTON: Noise analysis of a laboratory gas turbine . . . . .	87
WILLIAM N. FINDLEY: Applied mechanics in modern design . . . . .	99
J. A. SULLIVAN and A. G. HANSEN: A method for locating the position of a normal shock in a converging-diverging nozzle . . . . .	119
B. J. FIELDING: Report on "The role of rigid body dynamics in an undergraduate engineering course" . . . . .	123
H. BREDOW and H. LIPPMANN: A lecture model for introducing statics . . . . .	131
NORMAN JONES: A problem suitable for introducing the use of a digital computer to undergraduates . . . . .	135
G. PALLETT: Relaxation method for two-dimensional field problems . . . . .	147
A. K. JOHNSTON: Unit analysis . . . . .	155
A. C. WALSHAW: Note on students' difficulties with units in mechanical engineering . . . . .	165
Letter to the Editor . . . . .	169
Book Reviews . . . . .	177
Erratum . . . . .	177

# BULLETIN OF MECHANICAL ENGINEERING EDUCATION

## Number 3

	PAGE
Editorial . . . . .	179
T. B. DAVEY and B. KAUFMAN: Bio-engineering in the mechanical engineering curriculum . . . . .	181
P. D. RICHARDSON: A swinging thermometer: experience with a design project . . . . .	185
W. CARNEGIE: Rotary inertia and gyroscopic effects in overhung shaft systems . . . . .	191
T. C. FIRBANK and J. STEPHENSON: The design of a cantilever spring with a prescribed non-linear force deflexion characteristic . . . . .	201
W. A. C. SWIFT: The use of an elliptical pendulum to demonstrate non-linear vibrations . . . . .	207
R. B. M. JENKINS: The mechanics of a railway wagon on a curved track . . . . .	217
J. SKORECKI: Introduction to noise control in the mechanical engineering course . . . . .	223
W. J. FROST: Impact apparatus . . . . .	231
F. C. APPL, E. L. WELD and L. W. SCULLY: Plastic membrane for torsional stress . . . . .	233
H. SCHENCK, JR.: An accelerated lift-test using a Graeco-Latin-square test plan . . . . .	241
J. N. CLAUSEN, R. D. SPRINGER and L. G. PALMER: The effect of open laboratory, scheduled laboratory and visual aids on scholastic attainment in engineering graphics courses . . . . .	247
Letter to the Editor . . . . .	263
Book Reviews . . . . .	265

## Number 4

Editorial . . . . .	275
D. C. HICKSON: The ideal internal combustion engine cycle. . . . .	277
D. J. WHITE: Petrol engine mixture strength test . . . . .	283
P. D. RICHARDSON: A note on heat transfer and the thermodynamics of irreversible processes . . . . .	287
R. M. HELSDON: The Zeroth Law of thermodynamics . . . . .	293
J. C. DENT: A Liebmann network analogue for heat transfer laboratory work . . . . .	295
J. W. J. WIELOGORSKI: The hydraulic analogy to the flow of perfect gas . . . . .	305
G. PALLETT: Force and rate of change of momentum—A fluids experiment . . . . .	309
JOHN SANDOVER: Compiling and disseminating research information . . . . .	313
PETER D. SODEN: Literature searching . . . . .	319
A. BOLTON: The assessment of examinations . . . . .	329
W. G. WOOD: On teaching experimental method . . . . .	337
A. F. NEWELL and D. HOWE: The teaching of aircraft design . . . . .	349
B. J. PELAN: A report on a promising technique for teaching mechanical design . . . . .	359
Letters to the Editor . . . . .	363
Book Reviews . . . . .	365
